

BonPatron

The **BonPatron** website is a **free online spelling and grammar checking tool for French text** that is particularly useful for French as a Second Language (FSL) learners but also beneficial to native speakers looking to improve their writing skills.

Users paste their French text into the site's editor and click "Check Text" to have spelling and grammar errors identified and highlighted. Rather than automatically correcting mistakes, the tool provides **explanatory feedback designed to help learners understand and correct their own errors**, making it a valuable pedagogical resource. In addition to the free version, a **Pro subscription offers enhanced features** such as support for longer texts, interactive grammar exercises, a verb conjugator, and a detailed error summary.

BonPatron is ideal for students, self-learners, and teachers aiming to strengthen French writing through **meaningful feedback and active learning**
