

ReadWorks

The **ReadWorks** website is a nonprofit educational resource offering **free, research-based materials to enhance reading comprehension** for students from kindergarten through high school (K-12) and to support teachers in effective instruction. It provides access to **over 6,000 high-quality texts**, including both literary and informational passages, each paired with comprehension questions, vocabulary activities, teacher guidance, and lesson plans suitable for classroom or online use. Texts are organized by **grade level, text type, and reading skills**, making it easy for educators to tailor content to student needs and curricular goals. ReadWorks also features tools such as the *Article-A-Day* routine to encourage daily reading practice and built-in supports for tracking progress and differentiating instruction. With a mission to **equalize access to effective reading resources**, ReadWorks helps students build confidence, critical thinking, and deep understanding through structured literacy experiences.
